TotalCoursePoints is a Python API for generating class grades with a Gradescope frontend to allow students to have an updated view of how they are doing in the class.

Features:

- Custom slip time, late time, late penalties, etc
- Categories for assignments (Exams, Projects, etc) with custom settings for each category
- Optimal slip time calculation.
- Fully reprogrammable to allow for additional new course policies
- Support for different grading options and custom bins.

CHAPTER	

Getting Started

Clone or add the repo as a submodule to your existing setup. You can then use it as normal.

CHAPTER 3

API Documentation

3.1 API Documentation

- 3.1.1 Classroom
- 3.1.2 Category
- 3.1.3 Assignment
- 3.1.4 Student
- 3.1.5 Grade Bins
- 3.1.6 Utilities

CHAPTER 4

How to Contribute

Please make sure to take a moment and read the Code of Conduct.

4.1 Report Issues

Please report bugs and suggest features via the GitHub Issues.

Before opening an issue, search the tracker for possible duplicates. If you find a duplicate, please add a comment saying that you encountered the problem as well.

4.2 Contribute code

Please make sure to read the Contributing Guide before making a pull request.
